**Subject:** Conversation Record - 1 October 2013 - Jard HRS Update

SDMS DocID 584698

Martha,

This email is being sent to document the conversation on 1 October 2013 at approximately 0755 hours between Site Assessment Manager (SAM) Martha Bosworth and START member Gerald Hornok.

- SAM Bosworth indicated that she would be leaving the office shortly due to the government shutdown and wanted to touch base on any lingering questions. She was returning phone calls from START members Kelly and Hornok from Monday 30 September 2013.
- START asked SAM Bosworth how the federal government shutdown would affect the deliverable due dates for the upcoming NPL listing period. SAM Bosworth indicated that she was unaware what the government shutdown would do to the deliverable due date. She also indicated that the length of the shutdown would be factored into the regional deliverable timing. Based on the fact that START would be unable to work on the Jard HRS during the shutdown, SAM Bosworth indicated that she would not hold START responsible for missing the deliverable dates if they remain unchanged. She indicated that we would know more once the government was up and running.
- START member Hornok provided an update as to the progress of the Jard HRS. He indicated that the site summary, source, and GW sections would be done by the end of the week if work were to continue. This, however, is changed based on the government shutdown. START indicated that based on this morning the project is on track with appropriate budget.
- START member Hornok also indicated that the delivery of the hardcopy of the Jard Site Reassessment Trip Report might be delayed as the courier was scheduled for Wednesday 2 October 2013. If the government remained closed this would not occur. SAM Bosworth indicated that it was not a big deal as she already had the electronic version which had been sent to the state.
